

Living with TTP

Access to care and impact on health outcomes

Hello,

TTP is a rare disorder. If you have been diagnosed with TTP, please consider participating in this research survey that looks at differences in access to specialized care for TTP that might impact patient's long-term outcomes and well-being.

Study objective: To examine possible health disparities and access to care issues which could impact the outcomes and experiences of people living with TTP.

Why Participate? Identifying the source of possible health care disparities and access to care will help identify gaps in TTP care. Your involvement will help to identify more ways in which TTP patients can be supported.

Who can participate? Anyone over 18 years of age who has been diagnosed and treated for TTP is eligible to participate in this research study.

How long will it take? The survey should not take more than 10-15 minutes.
